Why is WT2 Plus better than other products?

Translation Device	How to use	Interactive Style	Features
APP / Handheld Device	Pass back and forth like an interview.		Inconvenient: Need to pass back and forth.
1 (Phone) + 1 (Earbud)	One puts on the earbud, the other one holds the phone.		Convenient for one side: Not friendly to the other party.
2 (Phones) + 2 (Earbuds)	Need the other party to download the app on their phone before communicating.		Not practical to request the other party to download the app.
1 (Phone) + 2 (Earbuds)	Each party wears one earphone. 3 modes are available to choose.		Suitable for both long-time and short-time conversation. Easy to get started.

Communication is more than words.
It's expression, eye contact and body languages.
